Employees

## For 75 years Quality and innovation

MediPac® was founded back in 1948. Thanks to its special expertise and in-depth knowledge of the market, MediPac® has specialised in the distribution and development of consumables for ozone-oxygen therapy and the customisation of pharmaceutical packaging. The key and driving force was and is our high quality standards for our products. Continuous development, customised service and ongoing investment have made us an innovator in the field of pharmaceutical primary packaging.

### ➤ Made in Germany – known throughout the world

Our products have established themselves on markets worldwide: as far as Europe, Asia and Australia. We and our customers rely on our in-house, experienced production, which is subject to strict European quality standards.

Manufacturing in Germany is a plus and a must, which our customers greatly appreciate and in turn boosts their business and enables them to provide people with the best possible health care.

Quality has a future - at MediPac® since 1948.

# Our extensive delivery and service programme

## ➤ Medical products with a focus on consumables for ozone-oxygen therapy and phlebotomy

PPS Sodium Citrate 3,13%  
PPS Transfusion-Set  
PPS Transfer-Filter-Set  
PPS Blood collection devices

## ➤ Sterile packaging for laboratory use

SPM Vacuum bottle 250 ml  
SPM Vacuum bottle 500 ml  
SPM Vacuum bottle 250 ml with Sodium Citrate  
SPM Vacuum bottle 250 ml with Sodium Citrate and Diffusor

Options:  
The bottles are available with labelling in several languages and in other sizes such as 50, 70 and 100 ml.

## ➤ Customised pharmaceutical primary packaging (Ready-to-sterilization und Ready-to-use)

MediPac® produces customised pharmaceutical primary packaging in project work with the customer, in particular for the target groups of the pharmaceutical industry and for laboratories, customised pharmaceutical primary packaging.

Processing steps, rinsing processes and sterilisation methods can be freely defined, as can the type of sterile packaging or packaging. Multiple packaging is possible. Various test procedures with regard to sterility, particles or endotoxins can be included in the production process. The products can be manufactured ready-to-use or ready-to-sterilise. They can therefore be used immediately by the customer.

## ➤ Pharmaceutical primary packaging, incl. accessories

**Glass products:**  
Molded glass, tubular glass, hydrolytic classes 1 - 3  
z. e.g. infusion bottles, injection bottles, pipettes

**Closures:**  
Aluminium, plastic  
e.g. crimp/combination caps, screw caps

**Rubber products:**  
Natural, butyl, chlorobutyl, bromobutyl, silicone, Teflon  
e.g. sealing discs, freeze-drying, infusion and injection plugs

**Plastic packaging**  
Polypropylene (PP), polyethylene (PE, LDPE, HDPE), aromatic polyester (PET)  
e.g. cans, canisters, drums

## Our claim: First-class quality

Our customers include leading companies around the world and together we focus on making health available to all as the greatest good and continuously improving the pharmaceutical packaging and medical devices required for this.

We are convinced that every detail in the manufacture, distribution and administration of medicines has a decisive influence and makes the further development of medical practice possible in the first place.

At MediPac® we focus on the quality of our products and the continuous improvement of our processes. Quality is of the utmost importance to us, firmly anchored in our corporate philosophy and a central component of the way we work.

## Our certifications

Our production and sterilisation processes undergo strict validation procedures and regular quality controls. In this way, we ensure that we meet the highest national and international standards and continuously achieve outstanding results.

The following certificates confirm the consistent implementation of our documented quality management system:

- DIN EN ISO 9001
- DIN EN ISO 13485
- DIN EN ISO 15378
- EU-Directive 93/42/EWG
