20. March 2020

Coronavirus

Dear Sir or Madam,

due to the continued outbreak of the corona virus (COVID-19, corona virus, SARS-CoV-2) the MediPac GmbH has taken these necessary precautions to prevent an infection to our staff and customers

To our knowledge, we have not suffered direct or indirect consequences of an infection. Furthermore, we will take the necessary precautions to minimize the risk of any restriction in our delivery capability.

Our employees have been instructed to follow the recommended hygiene measures highlighted by our ministry of health. Furthermore, we have made extra arrangements as medical device manufacturers. There has also been an emergency plan constructed in the case of an infection. In addition, we are staying in constant contact with our suppliers so that they can inform us in the event of an infection and the resulting delays or restrictions in their delivery capacity.

We are constantly re-evaluating the situation in our management based on the consideration of the "Robert Koch Institution".

Hopefully, we will see improvements in this abnormal situation soon.

For further questions, we are at your disposal.

With kind regards
MediPac GmbH
